THE GLOBE PROGRAM

<https://www.globe.gov>

The central element is the NASA FDL logo, which consists of the letters "FDL" in a large, bold, sans-serif font. A thick, dark curved line starts from the top left of the "F" and sweeps down towards the bottom right, passing through the "D" and ending near the bottom of the "L". Above the "F", the word "NASA" is written in a smaller, standard sans-serif font. To the left of the "F", there is a series of small black dots and plus signs arranged in a curved path that follows the curve of the main line.
